**Thank you very much for selecting Pure-Pro Water Corp.**  
In order to bring the best use of your system, please read the user's manual carefully before installation and follow the regulations.

## System overview

■ ERS-105  
■ ERS-106(M,R,A,UV)

■ EZ-105  
■ EZ-105P

### Selected filters

Mineral Filter

Fra-Infrared Filter

Alkaline Filter

Ultraviolet Sterilizer

■ EZ-105 Green Series  
■ EZ-105P Green Series

■ EZ-105 Orange Series  
■ EZ-105P Orange Series

■ EZ-105 Blue Series  
■ EZ-105P Blue Series

## Components

Standard faucet

European ceramic faucet  
(upgrade faucet is acceptable)

Water storage tank

Tubing

Deliver-valve

Water supply connector

Drain saddle

Tank ball shut-off valve

RO / NF Membrane

## Tubing connection diagram

### Connecting the color tubing

- Connect the WHITE tubing to the water supply connector.
- Connect the BLUE tubing to the countertop faucet.  
*If upgraded filters installed:*  
Connect the BLUE tubing to the upgraded filter.
- Connect the BLACK tubing to the drain saddle.
- Connect the RED tubing to the storage tank.

## Installation diagram

### Input water :

### Install water tank :

### Install faucet :

### Install drain saddle :

### Install membrane :

- Remove the tube.

- Remove the membrane housing cap.
- Install the membrane by carefully pushing the spigot end into the socket at the far end of the housing until completely in.

## Installation diagram

1. Turn off the water supply. Loosen the stainless steel pipe connector. Get feed water connector and connect it to the stainless steel pipe.

1

2. Get tubing white, connect it with deliver valve and the inlet water supply.

2

3. Take tubing red, connect it to the deliver valve and the inlet water to storage tank.

3

4. Take tubing black, connect it with the drain out.

4

5. Use an electric drill and drill an approximately 1 cm hole through the kitchenware table. Take out the faucet and its components. Install the faucet and the rubber gasket to the kitchenware table. Take tubing blue. Wear the concave type screw on tubing blue and insert the tubing shroud as shown in the picture. Connect the tubing top with the faucet end. Then connect the tubing end to the last stage filter.

5

6

6. Make sure that you complete. If so, switch on water supply and plug in electricity.

PS. Do not use drink water from the first made water in the tank.

## Change filters

### Change stage 1, 2, 3

- 1 Before filter replacement, please make sure water and electricity supply are cut off.  
Please turn off the tank ball valve, too.
- 2 To loosen filters, turn and rotate clockwise.
- 3 To tighten filters, turn and rotate anti-clockwise.

### Change stage 5, 6, 7, 8

- 1 Before filter replacement, please make sure water and electricity supply are cut off.  
Please turn off the tank ball valve, too.
- 2 Filters carry direction of water flow. Please make sure the correct flow direction during installation.
- 3 Loosen the quick fitting on both ends to replace the filter.
- 4 To avoid leakage, please tighten the quick fitting with Teflon tape before filter replacement.

## Change RO / NF membrane

### Change stage 4

- 1 Before filter replacement, please make sure water and electricity supply are cut off.  
Please turn off the tank ball valve, too.
- 2 Remove the tube.
- 3 Remove the membrane housing cap anticlockwise.
- 4 Remove the membrane by a pincer.
- 5 Install the membrane by carefully pushing the spigot end into the socket at the far end of the housing until completely in.
- 6 Be sure tighten with O-ring to prevent from leaking.

※ After changing filters, let water run for about 15 minutes to clear the filters.

## Operation regulation

- A. With everything connected, turn on the water check for leaks.
- B. Make sure the storage tank shut-off valve is "OFF". Open the sink top faucet.
- C. Within a few minutes (up to 15) the water will start to run from the faucet slowly.
- D. Let the water run for at least 30 minutes. This flushes the carbon filters on first time use.
- E. After initial flushing, open the shut-off valve on the tank and close the sink top faucet.
- F. Tank will now full of water (usually 2 to 3 hours) after the tank has filled.  
Open the sink top faucet and drain all water until the storage tank is empty and there is only a small flow from the sink top faucet. \*\*\* DO NOT USE FIRST TANK OF WATER.\*\*\*
- G. Close the sink top faucet. The system is now ready for use.
- H. Change filters regularly every 6 to 12 months and have the membrane checked annually.

### Caution

- 1. Do not use hot water (over 45°C)!
- 2. Do not freeze the machine!
- 3. Switch off electricity and water source if away for more than 5 days, and drain out pure water.
